JOINT TUFTS/MIT COSMOLOGY SEMINAR

Simulations of CDM and Beyond

Mark Vogelsberger

MIT

In my talk I will first present state-of-the-art results of large-scale hydrodynamical galaxy formation simulations, which are capable of reproducing large amounts of observational data. In the second part of my talk I will show how CDM could be modified to solve some of the outstanding small-scale problems.

Tuesday, February 7, 2017, 2:30 pm

574 Boston Ave, Room 310

Tufts University

Refreshments at 2:00 outside room 304
