

JOINT TUFTS/MIT COSMOLOGY SEMINAR

*Where is the cosmological
constant hiding?*

Stephon Alexander
Brown

The cosmological constant problem, and its close cousin dark energy, stands as one of the deepest mysteries facing cosmology and fundamental physics. In this seminar, after a pedagogical review of the cosmological constant problem, I will provide two new promising directions to address the cosmological constant and dark energy.

Tuesday, February 12, 2019, 2:30 pm
Cosman Seminar Room
Center for Theoretical Physics
Building 6C, Room 6C-442
Massachusetts Institute of Technology
Refreshments at 2:00 in the same room
