

## ATTENTION: PHYSICS MAJORS

**Are you curious by nature? Interested in technology? Do you enjoy solving problems and discovering how things work?**

Wakefield electrical engineering firm seeks **Entry Level Design Assistant** to join our growing team.  
**No experience necessary.**

### **Job Description:**

The **Design Assistant** will be expected to wear many hats. Once trained, this person will be assisting our Electronic Hardware Design team, developing CAD (Computer Aided Design) models, interfacing with customers and aiding in our QA processes, among other important tasks.

We will train the candidate from the ground up. Prior experience is a plus, but not necessary.

This position is best suited for someone with very good organizational skills and someone who cares compulsively about the quality of their work. The nature of the work can be tedious at times, so a strong attention to detail is a must. The ideal candidate would also be a fast learner, flexible, and a good problem solver, as we handle many different types of projects that each offer unique challenges.

Great personal and communication skills are important for both internal and external interaction. The **Design Assistant** must be able to speak and write clearly when describing complicated issues, whether it be in person, over the phone or through email.

We are looking for a team player, someone who is hardworking, friendly, energetic and eager to learn.

### **Requirements/Qualifications:**

0-3 years experience  
Must be a US citizen or Green Card Holder.

### **Additional Information:**

Full-time hourly position (\$18-\$20/hour)  
Health and Dental insurance  
Vacation time
