

JOINT TUFTS/MIT COSMOLOGY SEMINAR

Inflation after False Vacuum Decay: Prospects after Planck

Daniel Harlow

Institute for Advanced Study

I will discuss recent work with Bousso and Senatore on possible observational signatures of our universe being nucleated inside of a false vacuum bubble. I will discuss both the practical phenomenology and the probability in the landscape of these signatures.

Tuesday, February 11, 2014, 2:30 pm

Robinson Hall, Room 250

Tufts University

Refreshments at 2:00 in Knipp Library, Room 251
