

# JOINT TUFTS/MIT COSMOLOGY SEMINAR

---

## *Simulations of CDM and Beyond*

Mark Vogelsberger  
MIT

In my talk I will first present state-of-the-art results of large-scale hydrodynamical galaxy formation simulations, which are capable of reproducing large amounts of observational data. In the second part of my talk I will show how CDM could be modified to solve some of the outstanding small-scale problems.

Tuesday, February 7, 2017, 2:30 pm  
574 Boston Ave, Room 310  
Tufts University

Refreshments at 2:00 outside room 304
